

‘An Introduction to Asset Management’ eLearning Package

Part of our Blended Learning line of products, allowing you to learn at your own pace, from the comfort of your own home or office.

This eLearning package covers the six Asset Management subject groups in AMCL’s Conceptual Model, which has now been adopted by the Institute of Asset Management (IAM) to help to describe the overall scope of Asset Management.

Through industry examples and case studies, the eLearning package highlights the fact that Asset Management is about the integration of these groups of activity and not the activities in isolation.

Most users complete ‘An Introduction to Asset Management’ eLearning course within 2-3 hours. The material is modular and enables users to complete the course over a number of short sessions.

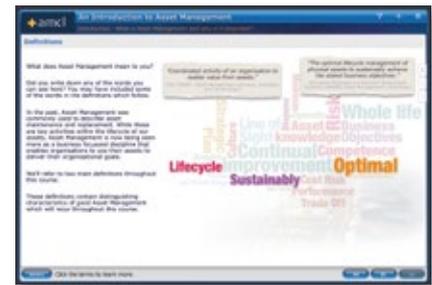

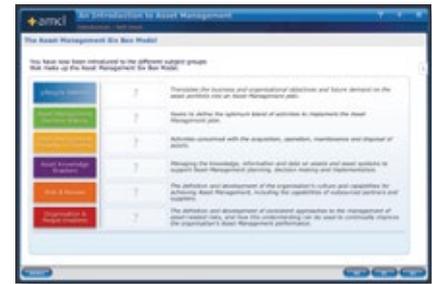

Why use AMCL's eLearning Course?

AMCL's eLearning package is ideal for those who want to gain a solid understanding of Asset Management systems and approaches, and can be accessed through any computer with an internet connection*.

This means learners are able to limit the time spent away from day to day duties, with no need to travel as they can study from the comfort of their workplace or home office.

AMCL's eLearning uses the Asset Management Conceptual Model, adopted by the Institute of Asset Management (IAM) and references BSI PAS 55 and ISO 55001 as well as other sources of good practice. Through industry examples and case studies, AMCL's eLearning highlights the fact that Asset Management is about the integration of these groups of activity and not the activities in isolation.

Benefits include:

- Cost effective
No classroom or instructor fees, and no need to travel or spend more time than necessary away from daily duties, with less cover required.
- Flexible
Learners study where and when they want to, all that is needed is a computer and internet connection*.
- Effective
Learners study at their own pace, in a comfortable environment, and with less pressure to understand content 'straight away'.
